G.O.Rt.No. 306,

Dated: 27-05-2011.
Read the following:-

From the Commissioner (R&R), Irrigation & CAD Department,
Secunderabad Lr.No.647/CRR/SS/2010, dated 10-09-2010.

>><<

O R D E R:

In the reference read above, the Commissioner (R&R), Irrigation & CAD Department, Secunderabad has reported that the Nigwa villagers have requested to consider the entire villages as submerged because of the inundation of village due to unprecedented floods in 1983. In his office letter dated 30-6-2010, a (3) Men Committee was constituted to verify the issues / irregularities in R&R package in Nigwa village along with other villages under Gaddennavagu Project with the following:

- 1) The Senior Statistician, O/o the Commissioner (R&R)
- 2) The Executive Engineer, I&CAD, GVP, Bhainsa.
- 3) The Revenue Divisional Officer, Nirmal

2. The above Three Men Committee has visited the Nigwa village on 9-7-2010 along with other villages. The team has visited the FRL point in Nigwa village 358.7 Mts, the project FRL. The distance to village structure from the FRL point is at a distance of 650 M. If entire village is to be acquired, the distance will be around 800 Mts. from FRL. The source is passing through the side of the village, the recommended structures for acquisition are those which got submerged due to unprecedent floods in 1983 which are along with the stream. The village terrain topsy sloppy slant on both sides of the village. The team has gone round the entire village and found that the structures which are included as per the requisition given by the Executive Engineer, I & CAD, GVP Division vide his letter No.DB/D2/GVP/R&R/338/M dated: 04-02-2008. The team had a public meeting in the Gram Panchayath building, few families have represented that their houses have not been included in the list intentionally even though neighboring houses have been included in the list. The general consent of public is to acquire entire village since snake bites are very common. During the visit of team several snakes were seen around the houses.

3. In this connection, the Executive Engineer, Irrigation & CAD has opined that the gates will be opened at the project to safeguard the village from inundation. As such there is no danger for other houses as it is far from FRL 358.7 M.

4. The above (3) Men Committee has observed that the Nigwa (v) is outside the submergence area and located at a distance of 600m away from FRL (358.0M) and there is no danger for the balance houses and the village also have access to road. Hence the committee has not recommended the proposal for declaring remaining houses as submerged. However, it is observed that Government may take up a decision by appointing a high level committee in view of the request of the villagers on the circumstances reported by them to consider the R&R package to entire village.

(P.T.O.)

5. Government after careful examination of the matter hereby constitute a "Technical Team" comprising of the following Senior Engineers for spot inspection of the Nigwa village, Kubeer Mandal in Adilabad District and submit a detailed report for taking a final views in the matter.

- 1) The Engineer-in-Chief (Irrigation), Irrigation & CAD Department, Hyderabad.
- 2) The Chief Engineer, Quality Control (Telangana), Hyderabad.
- 3) The Engineer-in-Chief, Medium Irrigation, Hyderabad.

6. The above Committee shall inspect the above village and interact with the villagers with reference to their problems and record their observations and submit a detailed report with their specific views along with map showing the area etc., within a month to the Government for taking a final view in the matter.

(BY ORDER AND IN THE NAME OF THE GOVERNOR OF ANDHRA PRADESH)
